For courses in Macroeconomics. Economics brought to life by real-life application, Readers learn best when they see concepts applied to examples of their everyday lives, so Economics Today: The Macro View addresses real, cutting-edge issues while facilitating individual learning. The text shows readers how economy is front and center in their daily routines, while providing many ways to evaluate their understanding of key concepts covered in each chapter. The 19th Edition also includes a new emphasis on behavioural economy, along with all new problems, vignettes and functions involving readers and helping them focus on the central ideas in economy today. Also available with MyLab Economics MyLab™ Economics is an online homework, manual and assessment programme designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personal study plan that helps them better absorb course material and understand difficult concepts. Note: You buy a stand-alone product; MyLab Economy does not come packaged with this content. Students, if interested in purchasing this title with MyLab Economics, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you want to buy both the physical text and MyLab Economy, search for: 0134641752/9780134641751 Economics Today: The Macro View Plus MyLab Economy with Pearson eText – Access Card Package, 19/e Package consists of: 0134478762 / 9780134478760 Economics Today: The Macro View 013448124 / 978013448127 MyLab Economics with Pearson eText - Access card - for Economics Today: The Macro View PART 1: Introduction 1: Introduction 1: Introduction 1. Economy brought to life Real-world application Students learn the best when they see concepts applied to examples of their everyday lives, so Economics Today: The Macro View addresses real, cutting-edge issues while facilitating students learning. The text shows students how economy is front and centre in their daily routines, while providing many ways to evaluate their understanding of key concepts covered in each chapter. The 19th Edition also includes a new emphasis on behavioural economy, along with all new problems, vignettes and features involving students and helping them focus on the central ideas in economy today. Personalising learning with MyLab Economics MyLab™ Economics is an online homework, manual and assessment programme designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personal study plan that helps them better absorb course material and understand difficult concepts. Personalising learning with MyLab Economics MyLab™ Economics is an online homework, manual and assessment programme designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personal study plan that helps them better absorb course material and understand difficult concepts. The Improved eText keeps students involved in learning at their own time while helping to achieve greater conceptual understanding of course material. The worked examples, animations and interactive tutorials bring learning to life, and algorithmic practice allow students to apply the concepts they read about. Combining resources that illuminate content with accessible self-assessment, MyLab Economy with improved eText offers students a complete digital learning experience – all in one place. And with the Pearson eText 2.0 mobile program (available for selected titles) students can now access the Enhanced eText and all its functionality from their computer, tablet or mobile. Because students' progress is synchronized across all their devices, they can stop what they do on one device and pick up on another later – without breaking their draw. Updated! Figure Animations offer a step-by-step walk through selecting figures. Seventy percent of all figures are animated. Figure animations have been updated to reflect changes to the 19th edition. Draft Checks at the end of each section serve as speed bumps that encourage students to stop and check their understanding of fundamental terms and concepts before going to the next section. Consisting of a few multiple choices, where/fake, or fill-in-the-empty questions, they help students evaluate their progress on a section-by-section basis, so they can better prepare for homework, queries, and examinations. Self checks, the form of various fill-in-the-empty questions at the of each Learning Goal section, allow students to check their understanding of the key concepts they have just read before they move on. All answers are available in MyLab Economics. Videos for each Issues and Applications section expanding on key points and actual applications of the feature and tie key chapter concepts to actual examples. The videos contain footage such as photos and graphs, which help crystallize key takeaways for the student. Real-Time Data Analysis (RTDA) Exercises allow instructors to assess problems that use up-to-the-minute data. Each RTDA exercise loads the appropriate and most current available data from FRED™, a comprehensive and up-to-date data set maintained by the Federal Reserve Bank of St. Louis. Exercises are rated based on that case of data, and feedback is provided. Updated! Graphs are updated with Real-Time data from FRED so that students can observe the changing impact of these important variables on the economy. Digital interactive. Economic principles are not static ideas, and teach them should not be either! Digital Interactive are dynamic and encouraging assessment activities that promote critical thinking and application of important economic principles. Each digital interactive has 3-5 progressive levels and requires approximately 20 minutes to explore, apply, compare and analyze each topic. Many digital interactive includes real-time data from FRED so that professors and students display, in chart and table form, up-to-the-minute data about key macro variables. Digital Interactive can be awarded and rated within MyLab Economics, or used as a lecture tool to encourage engagement, classroom conversation and group work. Personal learning. Not every student learns the same way or at the same rate. With the growing need for acceleration through many courses, it is more important than ever to meet students where they learn. Personal learning in the MyLab Economics gives you the flexibility to incorporate the approach that best suits your course and your students. The study plan serves as a tutor, providing personal recommendations for each of your students based on his or her ability to master the learning goals in your course. This enables students to focus their study time by determining the exact areas they need to review, and allow them to use custom practice and learning tools – such as videos, eText, tutorials and more to get them back on track. By scripting the report in the Grade Book, you can then customize course lectures to prioritise the content where students need the most support – which provides you better insight into classroom and individual performance. Dynamic Study modules help students study effectively on their own by continuously studying their activity and performance in real time. Here's how it works: students complete a set of questions with a unique answer format that also asks them to indicate their confidence level. Questions repeated until the student student they all correct and with confidence. Once completed, Dynamic Study Modules explain the concept using material from the text. It is available as rated commands before class, and accessible on smartphones, tablets and computers. New! Instructors can now remove questions from Dynamic Study Modules to better fit their course. Algorithmically generated Homework helps students improve their understanding of the language of economy and prepare for queries and tests via instant feedback. Drawing graph exercises ensure varied and productive practice. Interactive Learning Tools, such as Help me solve it (a step-by-step tutorial) and Teach my explanations help the student right when they need it. News articles are available for classroom and assignment use and ask students to recognise and apply economic concepts to real-world events. These up-to-date articles and complimentary discussion questions are posted weekly to bring today's news into the classroom. Experiments that are flexible, easy to assign, automatically rated, and available in single and multi-layer versions, make learning fun and endearing. Report dashboard. View, analyze and report learning outcomes clearly and easily, and get the information you need to keep your students on track throughout the course, with the new Reporting Dashboard. Available via the Grade Book and fully mobile, the Reporting Dashboard offers student performance data at the class, division and app levels in an accessible, visual manner. New! Test item file. Nearly 500 new allocated MyLab Economics questions have been added for this edition, extending the database of questions to an average of more than 100 questions per chapter. New! Mathematics Review Exercises. MyLab Economy now offers a rich range of allocated and auto-rated exercises that direct fundamental mathematics concepts specifically to principles and intermediate economy students. Aimed at increasing student confidence and success, our new mathematics skills review Chapter R is accessible from the assignment manager and contains more than 150 digging, algebra, and calculus exercises for homework, quiz, and test use. Offering economic students' warm-up mathematics missions, mathematics remembrances or mathematics exercises as part of any content assignment has never been easier! Question help. MyLab Economics homework and practice questions are correlated with the textbook, they generate algorithmically to give students unlimited opportunity for practice and mastery, and they offer useful feedback when students enter wrong answers. Questions include guided solutions and other multimedia assets for extra assistance at point of use. Current News Exercises. Each week current Macroeconomic news stories, with associated exercises, are posted to MyLab Economics. Assigned and auto-rated, these multi-part exercises ask students to have economic concepts recognise and apply to actual events. Learn Catalysts™ helps you generate class discussion, adapt and promote your lecture learning with real-time analytical. As a student response tool, Learning Catalysts use students' smartphones, tablets or laptops to involve them in more interactive tasks and thinking. New! Download a full PowerPoint® easy creation of slide questions. New! Team names are no longer case sensitive. Help your students develop critical thinking skills. Monitor answers to find out where your students are struggling. Rely on in-time data to customize your teaching strategy. Automatically group students for discussion, teamwork and peer-to-peer learning. About the book NEW! AND EXPANDED! Emphasis on Behavioural Economy. The theory of bound rationality forms the basis of behavioral economy. This theory is expanded in the introduct chapter and various macro chapters. More importantly, in accordance with the desire to show the appropriateness of theory, every single chapter in the 19th edition has a behavioral economy example. New! End-of-chapter problems. There are six to eight new problems at the end of each chapter, many of which are based on the interactive graphs within the chapter. They require students to apply their critical thinking skills learned from the chapter. New! An opening vignette about a serious application of each chapter's theory with continued Issues & Applications function at the end of each chapter is new to this issue. Learning goals companse each chapter section to help student-use understanding and provide for self-assessment to ensure that students have grasped key concepts. New! A grab Did you know that the function starts each chapter. New! A variety of examples are classified into three categories, and each has three references from which the information was obtained: Sample Policy Sample Behaviours International Example NEW! Which is included as features in each chapter. New! You are there features demonstrate to students how real people respond to policy changes and changes in our economic environment. Domestic topics and events are presented by thinking/provoking discussions. Important policy questions help students understand public debates. Global and international policy examples highlight the continued importance of international perspectives and policy. Fundamental Marks at the end of each chapter offer students a quick run-off of the most important concepts they need to understand for each chapter, improving information retention. References and quotes for all examples in-text are provided for further exploration by instructors and students. Critical Analytical Questions and Web Resources provide further opportunities for discussion and exploration. Proposed answers to Critical Analytical Questions were raised in the Instructor's Manual. An Instructor's Manual contain additional practice and allocated questions for each chapter, to further understanding of the content of the The Endlof-Adrijna summary shows students what they need to know and where to go in MyLab™ goes™ for more practice. Self Checks encourage student interaction and offer an opportunity for them to check their understanding before they move on. Personalising learning with MyLab Economics MyLab™ Economics is an online homework, manual and assessment programme designed to work with this text to engage students and improve results.
